

First, pass the shooting flowers and get the gems & key. Walk back and open the red gate to the scritter. Chase him out and down the path slowly.

By taking 2 steps forward after the fireballs pass until you get in the line of fire. Then you'll take 2 steps forward, and 1 step backward. The rest of the way will be 3 steps forward and one step backward.

When you get the scritter out on the ledge (see screenshot), be prepared to move fast. As soon as the fire ball passes the scritter, start moving. It's best to use diagonal moves on the corners.

When crossing the fire spouts, use the same moves as with crossing the fire plants to keep yourself and the scritter from being burned to a crisp!

Once across safely, chase the scritter down the aisle to the left to safety and run collect the gems and hit the blue button to the right of the fire flower. Go all the way back to the beginning and get the gems and coins.

Return to the scritter and chase him onto the yellow button

Go grab that star!!
