

Create 4 rows of ice floats at the top. Fill up your Brr! and use one path to slide over.

Slide over and use all your Brr! to create ice floats to the coins. Go back to the Brr! Glove and refill.

Slide back over to fill in the ice floats to the coins.

Step on the lower button and off again until both turtles are coming down from the left side. Create an icefloat one spot lower than center to stop them. Go get the gems at the top and cross back over.

Refill your Brr and step on the lower button once again. The top turtle should bound off the bottom one and turn to be like this:

Stand on this turtle and shoot icefloats to the lower gems. Repeat to get back to the Brr! glove.

Now on to the lower part. Shoot icefloats to look like this, then refill your Brr!

Save your game as this can be tricky. Go down diagonally then hit the down button so you land on a safe place. Wait for the turtles to be out of the way and collect the gems in the right area; repeat for the other gems.

With the turtles on your left side, step out so a turtle turns and crosses the icefloats, bumps the wall and turns. Repeat with the last turtle. It should look like this. Go get those gems and a star!
